

Amendments to the Claims:

This listing of claims will replace all prior revisions, and listings, of claims in the application:

Listing of Claims:

Claims 1-11 (cancelled);

Claim 12 (currently amended): ~~The tool of claim 11, wherein the guide control unit further comprises an upper and lower plate pivotally connected to each other.~~ A tool table comprising:

a tabletop assembly;

a base assembly having a plurality of sides forming a substantially rectangular shape operatively connected with the tabletop in order to support the tabletop;

a guide control unit operatively connected with the base;

a plurality of leg assemblies connected to the base;

a portable table tool support bracket connected to the base;

a plurality of extendable work supports connected to the tabletop;

a gear assembly connected to the base in communication with the guide control unit;

a channel disposed within the base assembly;

a hand crank operatively connected to the gear assembly;

a chain operatively connected to both the hand crank and the gear assembly;

a return sprocket operatively connected to the chain, the gear assembly and the hand crank;

a drive sprocket operatively connected to the hand crank and the chain;

a adjustment lock operatively connected between the hand crank and the drive sprocket;

a drive shaft operatively connected between the hand crank and the drive sprocket.

Claim 13 (currently amended): The tool table of claim 12, wherein the guide control unit further comprises ~~at least one connected between the upper and lower plate~~ a hinge assembly.

Claim 14 (currently amended): The tool table of claim 12, wherein the guide control unit further comprises at least one adjustable spring connected to the hinge assembly ~~upper and lower plate~~.

Claim 15 (currently amended): The tool table of claim 12, wherein the guide control unit further comprises an adjustable vertical stop connected to the hinge assembly ~~lower plate and located between the upper and lower plate~~.

Claim 16 (currently amended): The tool table of claim 12, wherein the guide control unit further comprises tool attachment features located in the hinge assembly ~~upper plate~~.

Claim 17 (currently amended): The tool table of claim 12 ~~1~~, further comprising a plurality of trolley rails mounted about the circumference of the base.

Claim 18 (currently amended): A tool table comprising:

a tabletop assembly;

a base assembly supporting the tabletop assembly;

a tool support assembly removably connected to at least one of the table and the base for supporting a wood working tool so that the tool is above the table;

The tool support assembly comprising a guide control unit, a trolley connected to the guide control unit, a set of trolley rails connected to at least one of the table and the base for supporting the trolley and a gear assembly operationally connected to the trolley; a plurality of legs connected to the base for supporting the base and the tabletop; a tabletop support bracket located within the base for supporting a portable table tool; a plurality of tabletop members operatively connected ~~in cooperation~~ with the tabletop assembly, the tabletop members being pivotally connected to the tabletop assembly; a chain connected to the gear assembly and the trolley for moving the trolley along the trolley rails.

Claims 19-43 (cancelled).
